Project Design Phase-II
Data Flow Diagram & User Stories

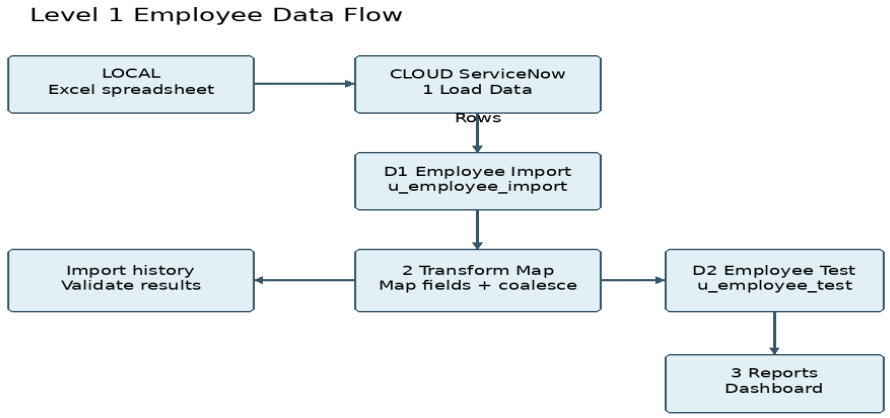

Date	1 October 2026
Team ID	SWTID-2026-9374
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Data Flow Diagrams:

The DFD shows how employee spreadsheet rows enter ServiceNow, move through Employee Import and the Transform Map, and reach Employee Test. Employee ID coalesce identifies existing records. Import history supports validation, while reports and dashboards present employee data to authorised users.

Employee Import Data Flow

User Stories

The user stories below cover the employee data import, validation, reporting and dashboard workflow.

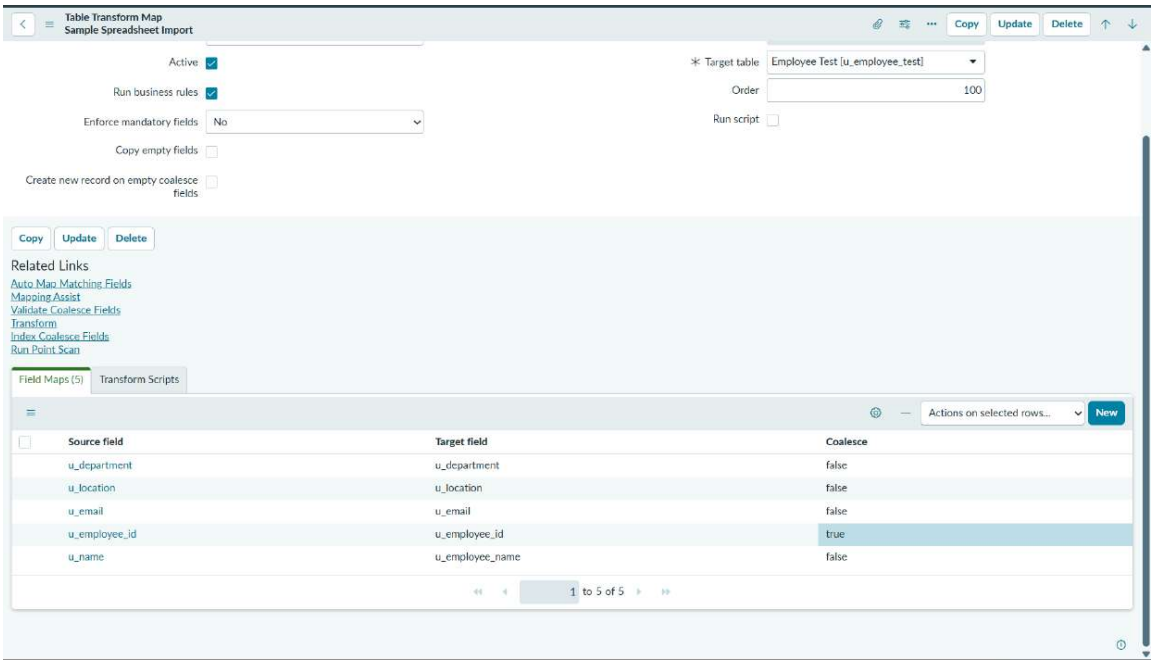

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Spreadsheet preparation	USN-1	As an administrator, I can prepare the five employee columns in Excel.	The file contains ID, Name, Email, Department and Location.	High	Sprint-1
Administrator	Target table	USN-2	As an administrator, I can create Employee Test with String fields.	u_employee_test contains all five required fields.	High	Sprint-1
Administrator	Load Data	USN-3	As an administrator, I can upload the spreadsheet into Employee Import.	The file loads successfully into u_employee_import.	High	Sprint-1
Administrator	Transform Map	USN-4	As an administrator, I can create Sample Spreadsheet Import.	Employee Import is the source and Employee Test is the target.	High	Sprint-1
Administrator	Field mapping	USN-5	As an administrator, I can map all source fields to target fields.	Each employee field has the correct target mapping.	High	Sprint-1
Administrator	Transformation	USN-6	As an administrator, I can run the Transform Map.	Import completes and target records are created.	High	Sprint-1
Administrator	Validation	USN-7	As an administrator, I can check history and target values.	History is reviewed and employee values match the source.	High	Sprint-1
Administrator	Coalesce	USN-8	As an administrator, I can enable coalesce on Employee ID.	Matching employee IDs update without duplicate inserts.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Repeat import	USN-9	As an administrator, I can import changed and new employees.	The four-row test updates two IDs and inserts two new IDs.	High	Sprint-1
HR Team	Reports	USN-10	As an HR team member, I can view department and location reports.	Pie and bar reports show counts grouped by the correct field.	Medium	Sprint-2
HR Team	Employee list	USN-11	As an HR team member, I can view all five employee fields.	Employee List Report displays the required columns.	Medium	Sprint-2
Administrator	Dashboard	USN-12	As an administrator, I can add and share the three reports.	Employee Analytics Dashboards contains all reports with restricted sharing.	Medium	Sprint-2
