Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	1 October 2026
Team ID	SWTID-2026-9374
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Prepare and load employee data	Create Excel columns: Employee ID, Employee Name, Email, Department and Location. Load the file into Employee Import.
FR-2	Create target table and map fields	Create Employee Test (u_employee_test) with five String fields. Configure Sample Spreadsheet Import and map source fields to target fields.
FR-3	Transform and validate records	Execute the Transform Map. Review transform history and verify imported values in Employee Test.
FR-4	Prevent duplicates and update employees	Enable coalesce on Employee ID. Reimport changed and new records; update matching IDs and insert new IDs.
FR-5	Create employee reports	Create Employees by Department (Pie), Employees by Location (Bar), and Employee List Report with all five fields.
FR-6	Create and share dashboard	Create Employee Analytics Dashboards. Add the three reports and restrict access using users, groups and roles.

Non-functional Requirements:

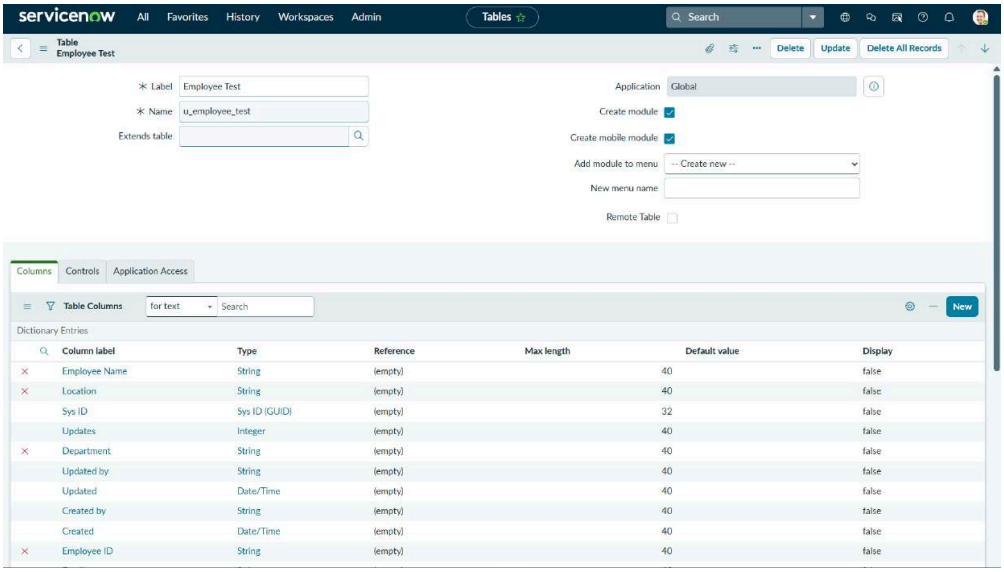

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	Use ServiceNow forms, Mapping Assist and personalised list columns for clear data entry and verification.
NFR-2	**Security**	Limit table, report and dashboard access to authorised users through roles, sharing and applicable ACLs.
NFR-3	**Reliability**	Preserve accurate field mapping. Use Employee ID coalesce to avoid duplicates and review import errors.
NFR-4	**Performance**	Import employee rows in bulk through Import Sets instead of entering each employee manually.
NFR-5	**Availability**	Users require access to the ServiceNow instance and an internet connection to import and view reports.
NFR-6	**Scalability**	Reuse Employee Import and the saved Transform Map for subsequent employee spreadsheets.

Source Documentation Screenshots

Reference: Import Data using Transform Maps(3).docx. These are the original project screenshots. They show documented configuration and output, not newly executed tests. Existing pending test results and not-applicable model metrics remain unchanged.
