Problem-Solution fit canvas 2.0

Reliable employee imports, duplicate prevention and clear HR reporting

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) — CS

HR teams and ServiceNow administrators who receive bulk employee data in spreadsheets and maintain employee records.

6. CUSTOMER CONSTRAINTS — CC

Access to a ServiceNow instance, authorised user permissions, an internet connection, and an Excel file with consistent employee columns are required.

5. AVAILABLE SOLUTIONS — AS

Excel or Google Sheets can prepare employee data. Manual entry is possible but takes time. Import Sets and Transform Maps support bulk loading, mapping and repeat updates.

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS — J&P

Import Employee ID, Employee Name, Email, Department and Location. Create accurate target records, update changed employees, prevent duplicate IDs, and provide employee reports.

9. PROBLEM ROOT CAUSE — RC

Employee information arrives in external spreadsheets. Manual migration and repeat imports without a matching key can create inconsistent or duplicate records.

7. BEHAVIOUR — BE

Prepare a Google spreadsheet and export .xlsx. Upload through Load Data, map source fields, run Transform, check import history and target records, then view reports.

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS — TR

A new employee spreadsheet, corrected names or emails, new employee IDs, or a request for department and location reports.

4. EMOTIONS: BEFORE / AFTER — EM

Before: concern about errors, duplicates and manual effort. After: confidence in validated records and a clear employee dashboard.

10. YOUR SOLUTION — SL

Load Excel into Employee Import (u_employee_import). Run Sample Spreadsheet Import to Employee Test (u_employee_test). Coalesce on Employee ID updates matches and inserts new IDs. Validate results and display three reports in Employee Analytics Dashboards.

8. CHANNELS of BEHAVIOUR — CH

8.1 ONLINE

Google Sheets; ServiceNow Load Data, Transform Maps, import history, Reports, and Employee Analytics Dashboards.

8.2 OFFLINE

Prepare and check employee spreadsheet files locally; verify source values before upload and review corrections with the HR team.
