Project Design Phase
Proposed Solution Template

Date	1 October 2026
Team ID	SWTID-2026-9374
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Proposed Solution Template:

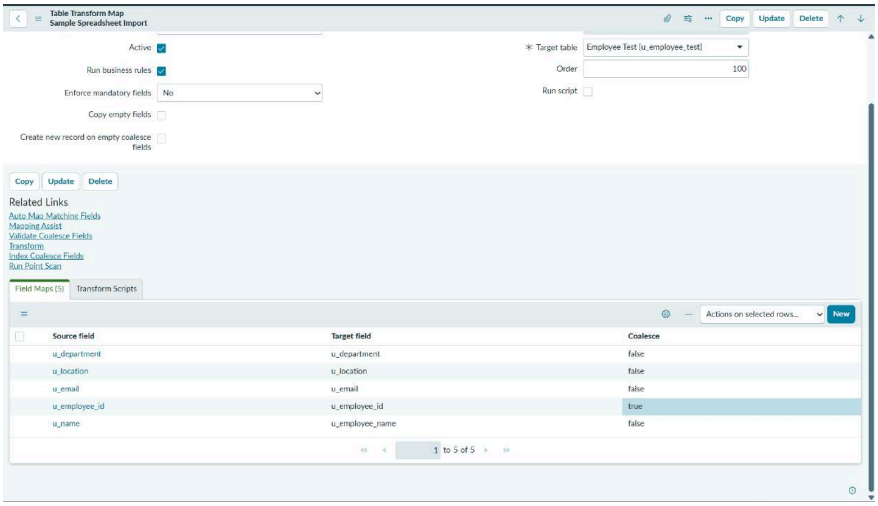

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Bulk employee Excel data must enter ServiceNow accurately. Manual entry and repeated imports can cause errors, duplicates and extra effort.
2.	Idea / Solution description	Load Excel into Employee Import. Map five fields to Employee Test, run the transformation, validate records, and build reports and a dashboard.
3.	Novelty / Uniqueness	Employee ID coalesce matches existing employees. Changed IDs update and new IDs insert, keeping repeat imports free of duplicate records.
4.	Social Impact / Customer Satisfaction	HR teams obtain reliable employee data, less manual work, and clear department, location and employee list views in one dashboard.
5.	Business Model (Revenue Model)	This is an internal employee data management project. No paid product, pricing or revenue model is specified in the source document.
6.	Scalability of the Solution	Reuse Employee Import and Sample Spreadsheet Import for later files. Add new employees and update existing records using the same mapping.

Source Documentation Screenshots

Reference: Import Data using Transform Maps(3).docx. These are the original project screenshots. They show documented configuration and output, not newly executed tests. Existing pending test results and not-applicable model metrics remain unchanged.
