Project Design Phase
Solution Architecture

Date	1 October 2026
Team ID	SWTID-2026-9374
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Solution Architecture:

The solution imports employee spreadsheets into ServiceNow, prevents duplicate records, validates changes, and presents employee reports.

- Prepare data: Create five employee columns in Google Sheets and export the file as Excel.

- Load and map: Stage rows in Employee Import; map source fields to Employee Test.

- Transform and validate: Coalesce on Employee ID, run Transform, and review history and target values.
- Report and share: Add department, location and list reports to Employee Analytics Dashboards.
