A Sprint fixed period or duration in which a team works to complete a set of tasks

An **Epic** is a **big task or project** that is too large to complete in one sprint. It is broken down into **smaller tasks (stories)** that can be completed over multiple sprints.

A **Story** is a small task . It is part of an **Epic**.

A **Story Point** is a number that represents how much effort a story takes to complete. (usually in form of Fibonacci series)

- **1-** Very Easy task
- **2-** Normal task
- **3-** Moderate task
- **5-** Difficult task

Story points: 1, 2, 3, 5 (effort estimates)

Sprint 1

Employee Data Setup and Import (Epic 1)

Prepare Employee Spreadsheet (USN-1) 2

Create Employee Test and String Fields (USN-2) 3

Transformation and Validation (Epic 2)

Load Data into Employee Import (USN-3) 1

Create Transform Map and Map Fields (USN-4) 3

Run Transform and Validate Records (USN-5) 3

Total Story Points in Sprint 1 = 2 + 3 + 1 + 3 + 3 = 12

Sprint 2

Duplicate Prevention and Repeat Imports (Epic 3)

Enable Employee ID Coalesce (USN-6) 5

Test Changed, New and Repeated Data (USN-7) 5

Employee Reports (Epic 4)

Create Department, Location and List Reports (USN-8) 5

Employee Analytics Dashboard (Epic 5)

Add Reports and Restrict Sharing (USN-9) 5

Total Story Points in Sprint 2 = 5 + 5 + 5 + 5 = 20

Total Story Points

Sprint 1 = 12

Sprint 2 = 20

Actual Velocity = Total Completed Story Points / Number of Completed Sprints

Total Planned Story Points = 12 + 20 = 32

Number of Planned Sprints = 2

Planned Average Capacity = 32 / 2

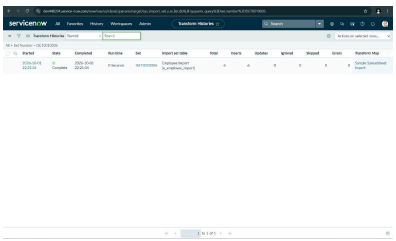

16 Story Points per Sprint (planned estimate)

The plan estimates an average capacity of 16 story points per sprint. Actual velocity requires completed sprint results.
