User Acceptance Testing (UAT) Template

Date	1 October 2026
Team ID	SWTID-2026-9374
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Project Overview:

Project Name: Import Data using Transform Maps (Spreadsheet)

Project Description: Import employee Excel data into ServiceNow using Employee Import and Sample Spreadsheet Import, with Employee ID coalesce, record validation, reports and a shared dashboard.

Project Version: Not specified

Testing Period: Not recorded

Testing Scope:

Spreadsheet loading; target fields; field mapping; transformation; validation; coalesce; repeat imports; three reports; dashboard content and access.

Twelve planned acceptance cases (TC-001 to TC-012) cover the nine project phases, including invalid-input and restricted-access checks.

Testing Environment:

URL/Location: ServiceNow project instance; its URL is not supplied.

Credentials (if required): Use authorised test accounts; account details are not provided.

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Valid spreadsheet	Prepare five columns; upload Excel.	Employee rows load into Employee Import.	Not executed	Pending
TC-002	Incorrect spreadsheet structure	Upload a test file with a required column absent; inspect mapping.	Missing mappings are identified; file is corrected before acceptance.	Not executed	Pending
TC-003	Target table fields	Open Employee Test; inspect field types.	All five employee fields are String fields.	Not executed	Pending

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-004	Source-to-target mapping	Open Sample Spreadsheet Import; compare five field maps.	Source Employee Import maps to Employee Test correctly.	Not executed	Pending
TC-005	Initial transformation	Run Transform; inspect Employee Test.	Rows are created and values match the spreadsheet.	Not executed	Pending
TC-006	Import validation	Inspect transform history and target list.	Status and row outcomes are reviewed; values are verified.	Not executed	Pending
TC-007	Changed and new IDs	Import four rows: two changed existing IDs and two new IDs.	Two existing records update and two new records insert.	Not executed	Pending
TC-008	Repeat identical file	Reimport the same file with Employee ID coalesce.	No duplicate IDs are created; unchanged rows are reviewed.	Not executed	Pending
TC-009	Department/ location charts	Create Pie by Department and Bar by Location; use Count.	Both charts show counts from Employee Test.	Not executed	Pending
TC-010	Employee list report	Create List report; select the five employee columns.	All required employee columns are displayed.	Not executed	Pending
TC-011	Dashboard content	Add the three saved reports to Employee Analytics Dashboards.	All three report widgets are available.	Not executed	Pending
TC-012	Restricted sharing	Set dashboard users/groups/roles; test authorised and excluded users.	Dashboard access follows the configured sharing and permissions.	Not executed	Pending

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
Not recorded	No defect log is supplied. This does not confirm that the project is defect-free.	Record reproducible steps during UAT.	Not assessed	Not assessed	Await tester observations.
Pending	Add a row for each confirmed defect.	Include file, field mapping and user context.	Assign after review	Assign after review	Record resolution and retest evidence.

Sign-off:

Tester Name: Not assigned

Date: Not recorded

Signature: Pending UAT execution and approval

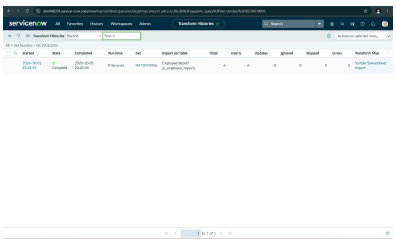

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
